We offer a wide range of Pharmacy Refrigerator designed to maintain the internal temperature control between 2 to 8°C along with a built-in fan, locks fitted as standard, automatic defrost and available with solid transparent door options ensure you are getting the best refrigerator purpose-built for the storage of your products to store products like reagents, pharmaceutical compounds, laboratory-grade product, medical compounds, medicinal products in pharmaceutical industries, medicals, research laboratories, etc. With a broad range of models available from single to large double door models, you will be able to find a model to meet your drugstore essentials. It’s microprocessor system temperature accuracy and temperature adjustment up to 0.1℃.

Upright Pharmacy Refrigerator 2 to 8? IUPR-1000 Series

Upright Pharmacy Refrigerator 2 to 8℃ IUPR-1000 Series with transparent door design for easy observation with temperature range 2 to 8℃, and forced air R600a and R134a refrigeration system with air cooler chiller distribution delivers cold air to different levels within each side of the storage chamber, ensuring consistent cabinet wide cooling with adjustable shelves are adjustable to any height and to fulfill different requests. Ergonomic design offers a clear view of stored items over large framed openings. The thin shape allows for cool recovery of your products, without the concern for swinging door clearances. Customers can choose from two types of interior shelving to suit their needs, security and safety lock to avoid unwanted access, provide storage space for easy sorting of a variety of blood products, and castes design and LED interior light.

- Cooling fan is permanently lubricated for long life
- Temperature range is up to 2 to 8°C
- Adjustable shelves and LED interior light, caster design
- Automatic defrost maintains optimum cooling capacity
- Improved refrigeration system design for more operative cooling and quick recovery
- Designed with 1 glass door with heating reflect reduces condensation
- Excellent battery back up
- Positive, forced-air circulation maintains temperature uniformity throughout
- Temperature variation within ±3°C
- High-efficiency field compressor with known field consistency
- Equipped with audible buzzing and visual flashing light type alarm system
- Multiple alarm system for safe and consistent process
- Assure inner temperature uniformity by an intelligent controlled fan with forced cycle system
- Assure safety by unwanted access and pharmaceutical products of many types
- Excellent durability and reliability

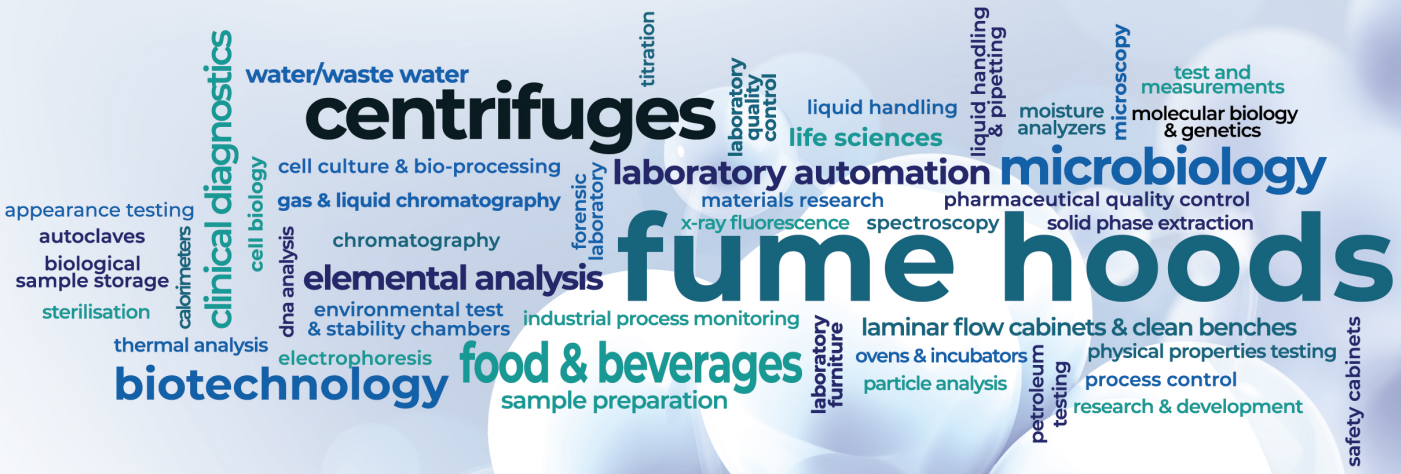

Double Pharmacy Refrigerator 2 to 8? IUPR-2000D Series

Double Pharmacy Refrigerator 2 to 8℃ IUPR-2000D Series are 10 shelves refrigerators that are always a spectacular addition to pharmaceutical laboratories, and they are remarkably economical. This allows us a reliable and regular development of our pharmaceutical refrigerators. Each unit consists of a robust housing and quality constituents provide reliability and durability. Ergonomic design offers a clear view of stored items over large framed openings. The thin shape allows for cool recovery of your products, without the concern for swinging door clearances. Customers can choose from two types of interior shelving to suit their needs, security and safety lock to avoid unwanted access, provide storage space for easy sorting of a variety of blood products, and castes design and LED interior light.
