Portable Colorimeter IPC-300 Series with black and white calibration, advanced PC software, and d/8° measuring geometry. The corresponding software serial number and password protection are configured in the colorimeter. Suitable for color difference analysis, color difference cumulative analysis, chromaticity index, color sample database management, simulating object color, etc. Illumination locating is a quick, simple, and suitable locating function.

- One-touch access to measurement interface
- Structure design in line with ergonomics
- Easy-to-use operating interface
- The repeatability ΔE is 0.08.
- Portable structure design which is more conducive to keeping the instrument stable when using
- With intellectual property of PC software.
- Be able to perform color difference analysis, color difference cumulative analysis, chromaticity index, color sample database management, simulating object color, etc.
- Li-ion battery and Support USB and RS332 interface

Optional Accessories

- Miniature thermal printer
- PC Software
- Powder test box
