DF Series Dry bath incubator is ideal for incubation and activation of cultures, enzyme reactions, blood urea nitrogen determinations, immunoassays, melting/boiling points, and a wide variety of other laboratory procedures. The economical, superb temperature control and compact dry bath incubators are designed for applications that require repeatable results and superior temperture stability.

The DF Series dry bath incubtor is an innovative design accommodating two blocks with independent ditital temperature controls. Each block can be set different temperatures - ideal for multiple users or applications where samples have to be transferred between two temperatures very quickly.
