Semi Autoclavable Variable Volume Micropipette SVG-10

Semi Autoclavable Variable Volume Micropipette SVG-10 is semi-autoclavable where the tip-cone assembly including containing piston, O-ring, spring, and the tip-cone, can be easily removed and autoclaved.

The cost-effective and economical variable pipette, suitable for the application in molecular biology, microbiology, immunology, cell culture, analytical chemistry, biochemistry, genetics process.

This ergonomic and accurate pipette has a unique construction high-quality plastic and combined with stainless steel piston with detachable volume control knobs, enabling switching between a fixed and a variable volume pipette within the same pipettor unit. Supply with an individual Calibration ISO 8655 certificate as standards, provided accurate and precise reading better than those laid down in the ISO 8655 standards.

Technical Specification:

Model	SVG-10
Volume Range	0.5 – 10 µl
Increment	0.1 µl
Accuracy ±%	4
Accuracy ± (µl)	0.08
CV ±%	2
C V ± (µl)	0.02
Catalogue No.	4002010-04
