Semi Autoclavable Variable Volume Micropipette SVQ-5

Semi Autoclavable Variable Volume Micropipette SVQ-5 used for high viscosity and volatile liquids with a fast dispensing rate. These are the most accurate and precise types of 121℃ semi- autoclavable pipettes that contain disposable tips and cover a volume range from 5-50 µl.

Provides an accurate and specific result for laboratory and scientific applications. Supply with an individual calibration ISO-8655 certificate. Dispensing head rotates for easy pipetting, separate piston and tip cone assembly allow for easy repair and maintenance
