Semi Autoclavable Variable Volume Micropipette AVG-200

Semi Autoclavable Variable Volume Micropipette AVG-200 is semi-autoclavable where the tip-cone assembly including containing piston, O-ring, spring, and the tip-cone, can be easily removed and autoclaved.

The cost-effective and economical variable pipette, suitable for the application in molecular biology, microbiology, immunology, cell culture, analytical chemistry, biochemistry, genetics process.

This ergonomic and accurate pipette has a unique construction high-quality plastic and combined with stainless steel piston with detachable volume control knobs, enabling switching between a fixed and a variable volume pipette within the same pipettor unit. Provides an accurate and specific result for laboratory and scientific applications. Supply with an individual calibration ISO-8655 certificate. Dispensing head rotates for easy pipetting, separate piston and tip cone assembly allow for easy repair and maintenance.

Technical Specification:

Model	AVG-200
Volume Range	20 – 200 µl
Increment	1 µl
Accuracy ±%	0.8
Accuracy ± (µl)	0.2
CV ±%	0.4
C V ± (µl)	0.1
Catalogue No.	4003030-04
